## Health Canada Maximum Number of Plants

<http://lois-laws.justice.gc.ca/eng/regulations/SOR-2001-227/page-7.html#h-22>

### Maximum Number of Plants

30. (1) In the formulas in subsection (2),

(a) “A” is the daily amount of dried marihuana, in grams, stated under paragraph 6(1)(c) or subparagraph 19(2)(d)(i), whichever applies;

(b) “C” is a constant equal to 1, representing the growth cycle of a marihuana plant from seeding to harvesting; and

(c) “D” is the maximum number of marihuana plants referred to in subsection 21(2) and paragraphs 29(2)(f) and 40(2)(g).

(2) The maximum number of marihuana plants referred to in paragraph (1)(c) is determined according to whichever of the following formulas applies:

(a) if the production area is entirely indoors,

$$D = [(A \times 365) \div (B \times 3C)] \times 1.2$$

where B is 30 grams, being the expected yield of dried marihuana per plant,

(b) if the production area is entirely outdoors,

$$D = [(A \times 365) \div (B \times C)] \times 1.3$$

where B is 250 grams, being the expected yield of dried marihuana per plant; and

(c) if the production area is partly indoors and partly outdoors,

(i) for the indoor period

$$D = [(A \times 182.5) \div (B \times 2C)] \times 1.2$$

where B is 30 grams, being the expected yield of dried marihuana per plant, and  
(ii) for the outdoor period

$$D = [(A \times 182.5) \div (B \times C)] \times 1.3$$

where B is 250 grams, being the expected yield of dried marihuana per plant.

(3) If paragraph (2)(c) applies, the maximum number of marihuana plants for both periods of production shall be mentioned in the licence to produce.

(4) If the number determined for D is not a whole number, it shall be rounded to the next-highest whole number.

SOR/2005-177, s. 17.
